

Do Antioxidants Interfere With Radiation Treatment for Cancer?

Sunday, 03 February 2008

Last Updated Saturday, 11 October 2008

There are few issues in cancer therapy so surrounded by confusion as the question of whether or not cancer patients should continue to take antioxidant supplements during radiation treatment.

Prompted by the many questions I receive from clients on this topic, I have written a report - Do Antioxidants Interfere With Radiation Treatment for Cancer? - that is designed to help patients make sense of the conflicting information they are likely to encounter on this issue. This 26 page report contains up-to-the-minute information concerning the controversial question of whether antioxidants can safely be taken during radiation treatment, and includes new research data that more clearly identifies which patients are most likely to be affected by potential interactions.

For more information on how to purchase this report, please [click here](#).
